SUMMARY

Passionate Technical Trainer and DSA Instructor with 2.5+ years of experience delivering industry-oriented training programs in Data Structures & Algorithms, Programming, and Interview Preparation. Successfully trained and mentored 1000+ engineering students through 100+ interactive sessions, helping learners strengthen problem-solving skills and improve placement readiness.

Proficient in Python, Java, C++, JavaScript, SQL, DBMS, OOP, and Web Development. Skilled in simplifying complex technical concepts, designing engaging learning experiences, and building real-world projects using modern technologies. Passionate about empowering students to become industry-ready software engineers.

SKILLS

Programming Languages Python, Java, C++, C
Web & Databases JavaScript, HTML5, CSS
Frameworks & Tools Git, GitHub, VS Code, Claude, nodejs, Expressjs
Concepts Data structures & algorithms, Object-oriented programming, DBMS
Problem solving Algorithms, Competitive coding
Databases SQL, MongoDB

WORK EXPERIENCE

Technical Mentor & DSA Instructor
ByteXL

Feb '24 — Present
Vadodara, India

- Trained and mentored 1000+ engineering students in Data Structures, Algorithms, and Programming Fundamentals.
- Delivered 100+ interactive coding sessions focused on problem-solving, debugging, and technical interview preparation.
- Designed structured learning roadmaps covering Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Dynamic Programming, and Advanced Algorithms.
- Conducted mock interviews and coding assessments to improve placement readiness.
- Provided personalized mentorship and performance feedback to help students overcome learning challenges.
- Improved student confidence in coding competitions, technical interviews, and campus recruitment processes.
- Helped students strengthen algorithmic thinking and coding proficiency.
- Increased engagement through hands-on problem-solving sessions.
- Supported placement preparation for students across multiple engineering institutions.

Cyber Security Virtual Internship
AICTE

May '23 — Jul '23

- Gained foundational Python and Java skills applicable to scripting, automation, and security tasks.

PROJECTS

Ecommerce [Link](#)

- Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT
- Created an eCommerce platform with role-based dashboards, product listing, order tracking, inventory management, and secure APIs.
- Implemented product management, order tracking, inventory handling, and secure API integrations.

Curriculum Benchmarking Agent

- Tech Stack: Python, AI/LLMs, NLP, Streamlit/React, FastAPI, MongoDB (adjust based on actual stack)
- Developed an AI-powered Curriculum Benchmarking Agent that analyzes academic curricula and benchmarks them against industry requirements, emerging technologies, and job market trends. The system identifies skill gaps and provides actionable recommendations to improve curriculum relevance and student employability.

EDUCATION

Bachelor of Technology, Information Technology in Information Technology
Institute of Technology (GPA: 9.0)
